# Weekly Coal Production

Energy Information Administration  
Washington, D.C.

Production for Week Ended:  
December 15, 1984

Published:  
December 21, 1984

## Preface

### The WCP

The *Weekly Coal Production* (WCP) provides weekly production estimates of U.S. coal by rank, as well as supplementary data which are published twice a month. Supplement 1 includes monthly statistics on U.S. coal production and aggregated annual historical data on coal supply and demand, consumption, stocks, imports, and exports. Supplement 2 contains monthly data covering electric utility coal consumption, stocks, and receipts; and coal imports and exports.

This publication is prepared by the Coal Division; Office of Coal, Nuclear, Electric and Alternate Fuels; Energy Information Administration (EIA) to fulfill its data collection and dissemination responsibilities as specified in the Federal Energy Administration Act of 1974 (P.L. 93-275) as amended. *Weekly Coal Production* is intended for use by industry, press, State and local governments, and consumers. Other publications that may be of interest are the quarterly *Coal Distribution Report* and the *Quarterly Coal Report*.

General information about this publication may be obtained from Robert Harris, Chief, Data Systems Branch, Ann Ducca, or Judith Wood. For specific information on the contents of this publication contact the National Energy Information Center (NEIC) at (202/252-8800).

## Highlights

Production of bituminous coal and lignite in the week ended December 15, 1984, as estimated by the Energy Information Administration, was 17,164,000 short tons. This was an increase of 994,000 short tons or 6.1 percent from production in the previous week. Production in the corresponding week of 1983 was 16,928,000 short tons. Bituminous coal and lignite production from January 1 through December 15, 1984 totaled 860,940,000 short tons, 13.9 percent above production in the same period of 1983.

Production of Pennsylvania anthracite in the week ended December 15, 1984, as estimated by the Energy Information Administration, was 99,000 short tons, 6,000 short tons or 6.5 percent more than production in the previous week. Production in the corresponding week of 1983 was 95,000 short tons. Anthracite production from January 1 through December 15, 1984 totaled 3,921,000 short tons, 1.1 percent below production in the same period in 1983.

# Need Information on Electric Power?

The Energy  
Information  
Administration  
has Data and  
Projections on:

- Production
- Consumption
- Prices
- Stocks of Fuels

A black and white photograph of a field with a utility pole in the background. The field is filled with low-lying vegetation, possibly a crop field. In the background, a utility pole with cross-arms is visible against a light sky. The right side of the image shows a dense line of trees.
